Market Commentary:

The EGX30 kept on climbing hitting a new historical high fueled by increasing trading volume which as we said supports the consistency of the rally. Yet, coming targets are at 15350 and 15700 where as we said we may use to trade gradually on. We recommend to trade only on the stocks that managed to make successful breakouts using the new target levels to trade on. On the other side, held positions are advised to move their protective stops higher as the market rallies to protect profits.

Global telecom (GTHE.CA):

Prices dived sharply below the previous 37 session's low due to aggressive selling pressure reaching the support level 7.20 closing slightly below but still needs confirmation.

We recommend to stay on cash till a reentry signal is clear which will probably appear in a successful rebound from the mentioned support.

STOCK SUSPENDED

Support levels: 7.20, 6.95
Resistance levels are: 7.50, 7.80

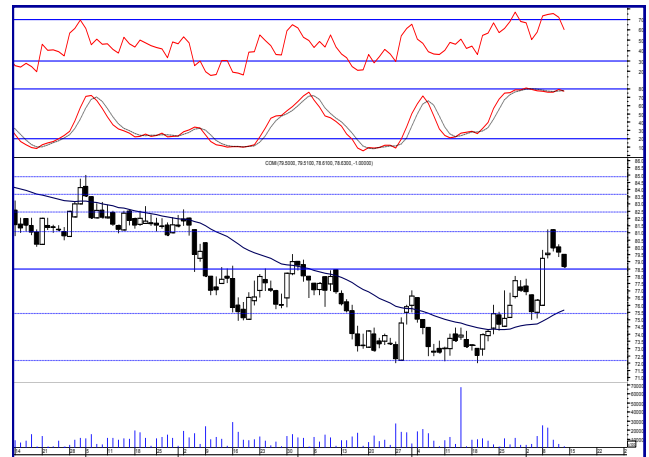

Commercial international bank (COMI.CA):

Prices continued declining as selling pressure extended pulling prices further down approaching the mentioned support level. Decreasing trading volume still indicated lower selling appetite which suggests high rebounding possibility from the coming support. Traders who took some profits may start buying gradually in the decline.

Held positions are advised to move stops higher below 75.00 bearing in mind that breaking this level will lead to lower levels.

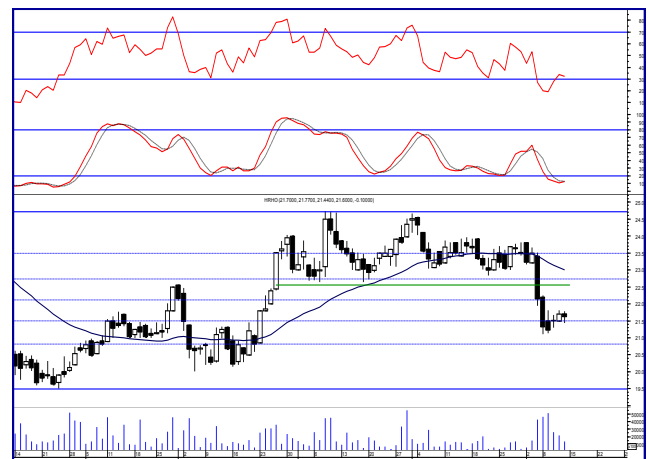

Support levels: 78.50, 77.00
Resistance levels: 80.00, 81.50

Hermes Holding (HRHO.CA):

Prices traded flat closing g slightly negative but managed to sustain the support level 21.50 but low trading volume still raise doubts of real buying strength. Yet, nothing can be done on current levels until the view is clear so that we can react safely. Notice that further decline is still expected to the coming support 20.80 where we believe we may take advantage of a short term trade.

Support levels: 21.50, 20.80
Resistance levels: 22.50-22.80, 24.00
