Market Commentary:

The EGX30 extended higher confirming clearing the resistance level 10680 turning it into support. decreasing trading volumes still keeps the market risk elevated keeping our outlook unchanged. We still recommend staying on cash till a clear reentry signal is clearly given. Notice that possible extension is possible to 10850 in which represents selling opportunity as long as trading volumes remains weak. Increasing trading volumes is always an important factor to prove real buying strength otherwise any upward move will only be an up correction within the short term down trend. Any open trades may take profit at least partially on the coming resistance level and wait for new signals to be evident.

Commercial international bank (COMI.CA):

Prices continued higher in an attempt to clear our resistance level 44.70 closing slightly above which still needs confirmation so everything is considered in place. Notice that confirmation will lead to further climbing to our important resistance level 46.40 where we recommend to continue using to trade gradually and stay on cash till a new trading opportunity is clear.

Held positions are advised to keep close stops placed and respected to stay protected against any adverse move.

Support levels: 43.50, 42.30
Resistance levels: 44.70, 46.40

Hermes Holding (HRHO.CA):

Prices witnessed an upward move in an attempt to clear the resistance level 12.10 but selling pressure took place from closing below leaving levels the same and so for our outlook. Existing positions are advised to hold keeping stops placed and respected below 11.25 as any decline below will give back the hand to selling party.

Support levels: 11.70, 11.25
Resistance levels: 12.10, (12.60-12.75)

El-Ezz steel rebar's' (ESRS.CA):

Prices remained quietly flat closing with no change keeping everything in place. Short term traders may use the new range for short term trades keeping stop placed below the mentioned support while conservatives to wait for all key elements to be clear to react safely on.

Support levels: 13.40, 12.30
Resistance levels: 14.50, 15.20
