Market Commentary:

The EGX30 witnessed an upward move ahead of trading before selling pressure dominates giving back most of the day's gains closing slightly positive. As we said, 10700 was our upside trigger therefore further upward moves are expected, while on the hand should defend any downside move. New short term trades may be opened on current levels as by breaking the mentioned level risk is reduced and using the mentioned resistance levels may safely be used. Held positions and new trades both are advised to keep close stops placed and respected

Commercial international bank (COMI.CA):

Prices remained quietly flat closing slightly positive leaving everything in place. Current levels are still considered safe as long as buyers manages to defend the major support level 58.50 so may be used for short term trading keeping stops placed and respected below 58.50

Support levels: 58.50, 56.70
Resistance levels: 60.00, 63.00

Hermes Holding (HRHO.CA):

Prices failed to continue higher as selling pressure halted the early attempt keeping balanced trading in control closing slightly positive. Yet, rally is still expected which as we said will probably reach our coming mentioned resistance zone. Close stops should always be placed and respected to protect the downside.

Support levels: 14.60, 13.50
Resistance levels: 15.25-15.55, 16.10

El-Ezz steel rebar's' (ESRS.CA):

Prices remained narrowly flat closing within the same range as quiet trading performance dominated keeping our outlook the same. Short term trades may be opened on current levels as further climbing will probably take place testing the resistance level 9.80 where we may use for quick trading bearing in mind that close stops should be placed and respected

Support levels: 8.50, 7.50
Resistance levels: 9.80, 10.60
