Market Commentary:

The EGX30 witnessed another upward move approaching our major resistance level 11675 as most of the stocks climbed higher closing the index near the session's high. We recommend to watch current levels very carefully as the mentioned level represents medium term turning point either turning the medium term trend into up or keeping it flat. Trading should be very selective and conservative keeping close stops placed and respected to reduce market risk. Notice that the mentioned support zone should be respected in any decline as any violation to it will indicate that bears are in control further decline will follow.

**Commercial international bank (COMI.CA):**

Prices inched higher closing slightly positive keeping levels unchanged and so for our outlook. As we said, remaining above the mentioned support keeps the stock in bullish mode targeting 57.70.

Defending the mentioned support levels keeps bullish sentiment intact where we use the mentioned range to safely trade on.

Support levels: 52.80, 51.60

Resistance levels: 57.70, (63.00-64.05)

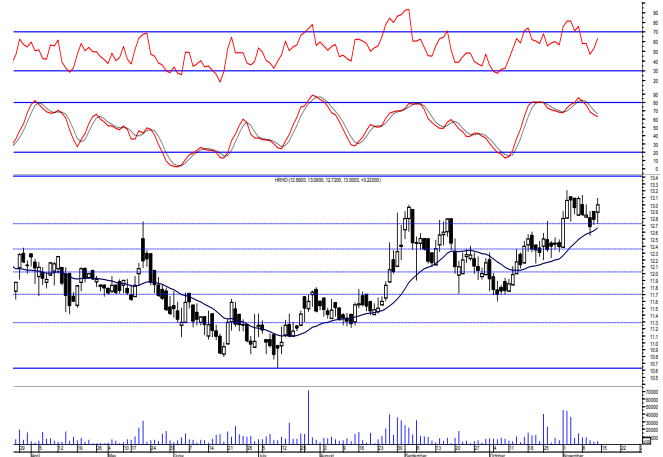

**Hermes Holding (HRHO.CA):**

Prices closed positive near the high as buying process dominated most of the session keeping levels the same and so for our outlook.

Existing positions are advised to hold keeping stops placed and respected below 12.10 as any decline below will give back the hand to selling party.

Support levels: (12-75-12.60), 12.10

Resistance levels: 13.40, 14.25

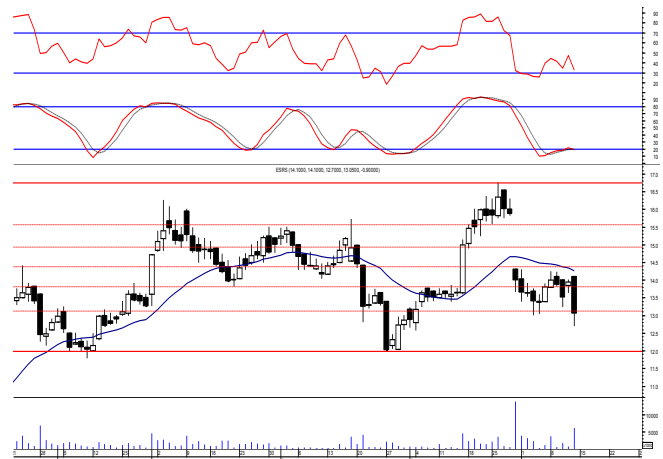

**El-Ezz steel rebar's' (ESRS.CA):**

Prices fell sharply down violating the support levels 13.80 turning it back into resistance and extended lower violating the prominent support level 13.20 which still needs confirmation due to positive signals occurred on the intraday frame. Confirming the violation of the support level 13.20 will indicate that bears gained back the near term technical advantage and therefore the upside potential will be invalid so stay heads up.

Support levels: 13.20, 12.00

Resistance levels: 13.80, 14.50
