Market Commentary:

The EGX30 remained narrowly flat as balanced trading performance dominated in most of the stocks closing the index with a slight negative change within the mentioned zone.

Short term trend is up as long as buyers manages to defend the mentioned support zone and we still expect containing the recent profit taking process and continue higher to the 2nd target level 11800 where we recommend to trade partially on. Bear in mind that the coming resistance zone will likely be reached where we may continue trading on.

Held positions should keep close protective stops to maximize profits.

Commercial international bank (COMI.CA):

Prices remained narrowly flat closing with no change for the fifth day below the support level 67.50 but lack of volumes still do not indicate the strength of sellers so confirmation is still needed. Yet, bull's still have the near term technical advantage as long as sustaining the support level 66.00 in which we believe that falling near will represent a good buying opportunity. Overall, we still expect reaching the second level 69.50 where we may trade partially on bearing in mind that the rally have the strong potential to continue to the resistance level 71.00.

Support levels: 67.50, 66.00
Resistance levels: 69.50, 71.00

Hermes Holding (HRHO.CA):

Prices remained under stress falling back ahead of the session near the support level 12.65 managing to rebound from closing near the session's mid range slightly negative keeping levels unchanged and so for our outlook. As we said, we recommend to stay on cash and wait for a confirmed buy signal to react safely on. Any held positions should watch the mentioned support as it represents an important defensive line.

Support levels: 12.65, 11.90
Resistance levels: 13.50, 14.00

El-Ezz steel rebar's' (ESRS.CA):

Prices traded quietly flat closing slightly positive keeping levels unchanged and so for our outlook. Yet, technical indicators and trading volumes still supports the bull case suggesting further climbing which will likely extend to the second target 9.00 where as we said we may use to trade gradually on the targets. Always keep close stop levels placed and respected to protect the downside.

Support levels: 7.75-7.55, 7.00
Resistance levels: 8.25, 9.00
