Market Commentary:

The EGX30 witnessed another upward move reaching our important resistance level 10680 closing slightly above which still needs confirmation. decreasing trading volumes still keeps the market risk elevated keeping our outlook unchanged. We still recommend staying on cash till a clear reentry signal is clearly given. Notice that possible extension is possible to 10850 in which represents selling opportunity as long as trading volumes remains weak. Increasing trading volumes is always an important factor to prove real buying strength otherwise any upward move will only be an up correction within the short term down trend. Any open trades may take profit at least partially on the coming resistance level and wait for new signals to be evident.
