Market Commentary:

The EGX30 extended higher as rebounding process resume in most of the stocks closing the session's high slightly above the resistance level 11675 but confirmation is still needed. Trading volumes increased but still not convincing so stay alerted.

Opened trades should watch the coming resistance level 11675 and may close portions around. Bear in mind that clearing it will give the bullish party the near term technical advantage therefore the market climbs higher easily.

We recommend to be conservative and very selective keeping close stops placed and respected to reduce market risk.

Notice that failing to defend 11440 will put the market under further stress therefore next support level will likely be reached (unexpected).

Commercial international bank (COMI.CA):

Prices remained narrowly flat closing slightly negative keeping levels unchanged and so for our outlook.

Notice that technical indicators are not clear and cannot be anticipated.

We recommend to wait for a successful breakout to the resistance level 52.80 or on the other hand existing positions to hold watching the mentioned supports very carefully.

Support levels: 51.60, 50.20
Resistance levels: 52.80, 54.15

Hermes Holding (HRHO.CA):

Prices climbed higher reaching our expected resistance level 15.25. Notice that managing to clear the mentioned level will indicate that bulls gained back the near term technical advantage and further rally will take place to the next mentioned level in which triggers a new trades.

We recommend to keep stops placed and respected and wait for new positions till a clear buy signal is clearly given.

Support levels: 14.45, 14.00
Resistance levels: 15.25, 16.35

El-Ezz steel rebar's' (ESRS.CA):

Prices continued higher approaching the resistance level 14.50 where as we said we may at least partially close the trades on.

Notice that clearing 14.50 will give a chance for a new trades to be tried as rally will continue to the next resistance zone & may extend to the prominent resistance level 15.60

We recommend using trailing stop strategy to reduce market risk and defend profits.

Support levels: 13.80, 13.20
Resistance levels: 14.50, 15.00-15.10
