Market Commentary:

The EGX30 sled sharply lower approaching our support level 10350 as most of the stocks failed to continue the recent rebounding pulling the index down closing on the session's low. Weak trading volumes still keeps the market risk elevated keeping our outlook unchanged. We still recommend staying on cash till a clear reentry signal is clearly given. Increasing trading volumes is always an important factor to prove real buying strength otherwise any upward move will only be an up correction within the short term down trend.

**Commercial international bank (COMI.CA):**

Prices again failed to defend our support level 42.30 as selling pressure overwhelmed turning it back into resistance. Yet, we recommend staying on cash & wait for confirmed buy signal so that we can react safely on. Any existing positions should always keep stops placed and respected

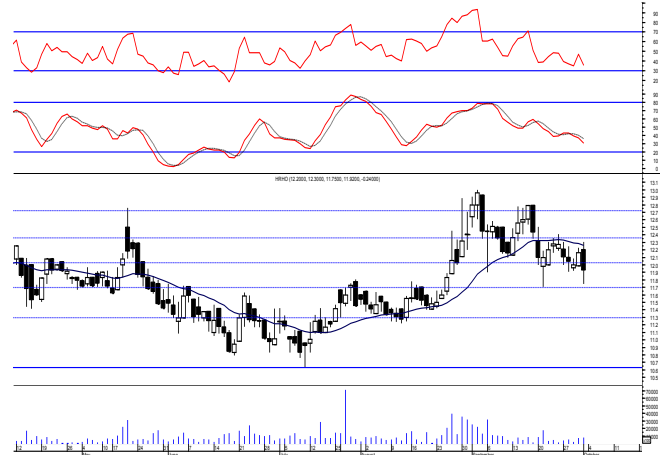

Support levels: 40.90, 39.40  
Resistance levels: 42.30, 43.50

**Hermes Holding (HRHO.CA):**

Prices witnessed a sharp decline violating our support level 12.10 closing below after failing to react on the positive signals occurred recently on the intraday frame. Our levels now are 12.10 & 11.70. Existing positions are advised to hold keeping stops placed and respected below 11.25 as any decline below will give back the hand to selling party.

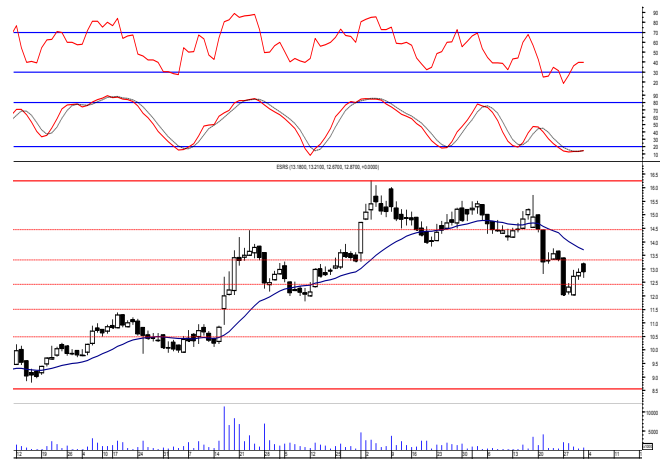

Support levels: 11.70, 11.25  
Resistance levels: 12.10, (12.60-12.75)

**El-Ezz steel rebar's' (ESRS.CA):**

Prices remained narrowly flat closing with no change as balanced trading performance dominated leaving everything in place. Short term traders may use the new range for short term trades keeping stop placed below the mentioned support while conservatives to wait for all key elements to be clear to react safely on.

Support levels: 12.30, 11.40  
Resistance levels: 13.40, 14.50
