Market Commentary:

The EGX30 witnessed a downward move which was mainly by the CIB while most of the stocks continued higher closing the index in red within the mentioned support zone keeping our outlook unchanged. As we said, trading volumes should increase to prove real buying strength otherwise the market will remain under stress. Short term trend is up and we still expect containing the recent profit taking process and continue higher to the 2nd target level 11800 where we recommend to trade partially on. Bear in mind that the coming resistance zone will likely be reached where we may continue trading on. Held positions should keep close protective stops to maximize profits.

Commercial international bank (COMI.CA):

Prices gapped down trading near the mentioned support level before rebounding process takes place gaining back most of the losses closing slightly below the support level 67.50 which is still considered in place. Yet, bull's still have the near term technical advantage as long as sustaining the support level 66.00 in which we believe that falling near will represent a good buying opportunity. Overall, we still expect reaching the second level 69.50 where we may trade partially on bearing in mind that the rally have the strong potential to continue to the resistance level 71.00.

Support levels: 67.50, 66.00
Resistance levels: 69.50, 71.00

Hermes Holding (HRHO.CA):

Prices traded quietly flat closing slightly negative after balanced trading performance leaving everything in place. As we said, by breaking the mentioned support negative implications will follow. Existing positions are advised to activate their stops while new traders to wait for a confirmed buy signal to react safely on.

Support levels: 12.65, 11.90
Resistance levels: 13.50, 14.00

El-Ezz steel rebar's' (ESRS.CA):

Prices closed slightly negative after quiet trading performance too place most of the session leaving everything in place. Our outlook is the same, increasing trading volume witnessed recently is significant still suggests strong potential breakout but price action should confirm. As we said we may trade partially on as market risk now is lowered specially that trading volumes significantly increased. Bear in mind that breaking the mentioned resistance zone will set new bullish targets at 8.25 & 9.00

Support levels: 7.00, 6.70
Resistance levels: 7.55-7.75, 8.25
