Market Commentary:

The EGX30 traded flat closing slightly negative as balanced trading dominated leaving everything in place. Increasing trading volumes still suggests further climbing which will likely reach the major resistance zone 10900-11100. Short term trades may conservatively be opened above the mentioned level. On the other hand any broken stop should be respected and wait for a confirmed positive signal. We overall recommend to stay on cash till a confirmed buy signal is evident. Risk takers who decides holding their positons are advised to keep close stops placed and respected.
