Market Commentary:

The EGX30 extended higher as most of the stocks continued climbing pushing the index higher and closing near the high suggesting further climbing specially by managing to close above 10414.

Trading volumes increased which will likely support the idea of further climbing to 10540 and may extend to 10650.

A weekly close is needed above 10414 to change our view from negative to flat leaving the market risk elevated.

New short term trades may conservatively be opened keeping close protective stops placed and respected

**Commercial international bank (COMI.CA):**

Prices remained narrowly flat closing slightly negative near the prominent support level 54.60. Yet, bears overall still have the short and medium term technical advantage. So watching the support level 54.60 is highly recommended as breaking it will be followed by further decline to the 2nd major support level 50.00. We recommend to stay on cash and wait for a confirmed buy signal to react safely on.

Support levels: 54.60, 50.00  
Resistance levels: 56.70, 58.50

**Hermes Holding (HRHO.CA):**

Prices witnessed an upward move managing to clear the resistance level turning it into support. Further climbing is now expected to the next mentioned resistance zone where we may use the range for short term trading. Close stops should always be placed and respected to protect the downside.

Support levels: 14.60, 13.50  
Resistance levels: 15.25-15.55, 16.10

**El-Ezz steel rebar's' (ESRS.CA):**

Prices witnessed another upward move closing near the high above the resistance level 9.80 turning it into support. Existing positions are advised to hold and may conservatively add on using the resistance level 10.60 to close on bearing in mind that close stops should be placed and respected.

Support levels: 9.80, 8.50  
Resistance levels: 10.60, 11.10
